DSLR Photography for Beginners: A Beginner’s Guide to ...
A typical lens has an aperture range of 2.8 to 22 (or, as it is more properly written, f/2.8 to f/22). The lower the number, the larger the hole letting in light. And the more light you let in, the shorter the depth of field.That is, if you set the aperture to f/2.8 then you can choose what distance from the camera is in focus (the best short 'depth of field' effects are found when the camera ...

A beginner's guide to DSLR cameras - Lonely Planet
Your DSLR camera gives you the option to shoot either JPEG or RAW files. JPEG is the default image format that’s used in most point-and-shoot cameras. These images are compressed to a smaller size by your camera with certain information being removed from the image, resulting in the loss of some detail and color variation.
