Case Studies in Occupational Epidemiology by Kyle ...

This casebook is designed for use in courses on epidemiology or occupational epidemiology. The chapters are based on actual studies and are written by the principal investigators in the field. The book is divided into four parts: cohort studies, case-control and proportionate mortality studies, cross-sectional studies, and surveillance and screening studies.

Case studies in occupational epidemiology (Book, 1993 ...

Results from occupational epidemiology studies have shown increased risk of AA associated with pesticides and benzene exposures [64,65]. The higher incidence among working-age adults suggests that environmental or occupational factors may play a role in the development of AA [65–67].

Occupational Epidemiology - an overview | ScienceDirect Topics

workers' health, namely occupational stress and the epidemiology of accidents. Chapter 17 gives an excellent overview of the uses of epidemiology in occu-pational health, and the last chapter presents a concrete case study, with an assessment of the use made of epidemiological methods. There are unavoidable

Epidemiology of occupational health

Overview Occupational epidemiology involves the application of epidemiologic methods to populations of workers. Occupational epidemiologic studies may involve looking at workers exposed to a variety of chemical, biological or physical (e.g., noise, heat, radiation) agents to determine if the exposures result in the risk of adverse health outcomes.

Safety and Health Topics | Occupational Epidemiology ...

A major concern in occupational epidemiology studies usually relates to confounding, because exposure has not been randomly allocated, and the groups under study may therefore have different baseline disease risks.

Bias in occupational epidemiology studies

In a case-control study, investigators start by enrolling a group of people with disease (at CDC such persons are called case-patients rather than cases, because case refers to occurrence of disease, not a person). As a comparison group, the investigator then enrolls a group of people without disease (controls).

NIOSH-TIC-2 Publications Search - 00238238 - Case studies in occupational epidemiology. This book provided 13 case studies for use in teaching epidemiology. The studies were arranged in four sections: cohort studies, case control and proportionate mortality studies, cross sectional studies, and surveillance and screening studies.

NIOSH-TIC-2 Publications Search - 00238238 - Case studies ...

Typically occupational epidemiological investigations begin with the observation of an unusual number of cases of disease among a group of workers. When the investigation does not go further than what is referred to as identifying a disease cluster, the study is referred to as a case series report. Cohort studies [edit]

Occupational epidemiology - Wikipedia

Case control studies The accompanying image shows an occupational cancer - of the nasal sinuses - which is fortunately rarer now than it used to be. In a case-control approach, 'cases' of this disease are compared to a carefully matched reference population of 'controls' (or 'referents') to determine retrospectively what differences there may have been in their occupational exposure histories.

Occupational epidemiology (COEH - University of Manchester)

Occupational factors have been proposed to play a critical role in bladder cancer. This population-based case-control study was conducted to confirm the association between selected occupational and non-occupational risk factors and risk of bladder cancer using data collected from the four western Canadian provinces.

Occupational exposure to chemical and petrochemical ...

This casebook is designed for use in courses on epidemiology or occupational epidemiology. The chapters are based on actual studies and are written by the principal investigators. They are divided into four parts: cohort studies, case-control and proportionate mortality studies, cross-sectional studies, and surveillance and screening studies.

Case Studies in Occupational Epidemiology (1992, Hardcover ...

Objectives: Accurate assessment of exposure is a key factor in occupational epidemiology but can be problematic, particularly where exposures of interest may be many decades removed from relevant health outcomes. Studies have traditionally relied on crude surrogates of exposure based on job title only, for instance farm-related job title as a surrogate for pesticide exposure.

Is farm-related job title an adequate surrogate for ...

The case studies describe the development of successful prevention, population health, and public health programs in graduate health professions education programs, as well as in 2-year and 4-year undergraduate institutions.

Teaching Case Studies - Association for Prevention ...

Several epidemiologic studies have been conducted over the last decades: population-based case-control studies; mortality studies and cancer incidence studies carried out in historical cohorts of workers employed in the industry; and case-control studies nested in occupational cohorts.

Occupational cancer in France: epidemiology, toxicology ...

To be included in this review, a study must have met the criteria of containing peer-reviewed results and analysis discussion on the relationship between occupational health and employment arrangements. Based on the criteria, the researcher narrowed down 43 articles out of 154 selected for review.
