Fine Silver by Hand - Introductory silver jewelry projects

...

Fine silver is defined by its purity. Any silver used for investment or trade on metal and commodities exchanges must be 99.9 percent pure, or .999, sometimes referred to as “three nines fine.” Investment grade fine silver is stamped with a hallmark certifying its purity. Sterling silver used in jewelry, for example, has a purity of 92.5 percent.

MJSA Guide to Stamping and Marking Regulations ...

A pretty good solder for fine silver would be an alloy with a small amount of copper. Enough copper to lower the melting point and to give it a liquidus/solidus melting range. I'd try 95% sil (950 sil) for a start. If you are not yet up to experimenting with alloys, try using sterling as a solder for fine silver, and make sure you use a modern
